PROFESSIONAL SUMMARY

Frontend Developer with 3.10+ years of professional experience developing scalable and responsive web applications using React.js, JavaScript, TypeScript, and modern frontend technologies. Experienced in REST API integration, Redux Toolkit, React Hook Form, Tailwind CSS, performance optimization, and reusable component development. Possess hands-on experience with the MERN stack through personal projects using Node.js, Express.js, MongoDB, JWT authentication, and role-based access control.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, HTML5, CSS3, SCSS
Frameworks / Libraries	React.js, Next.js, Node.js, Express.js, Redux Toolkit, React Context, Recoil, Zustand
Database	MongoDB, Mongoose
Data Fetching	React Query (TanStack Query), Axios, RESTful APIs
Form Validation	React Hook Form (RHF), Zod, Yup, Formik
UI Libraries	Tailwind CSS, shadcn/ui, Radix UI, Material UI, Bootstrap
Data Visualization	Chart.js, Recharts
Dev Tools	Git, GitHub, VS Code, Postman, ClickUp, Zoho, Webpack, Vite, CI/CD
Methodology	Agile, Scrum, Responsive Design, Performance Optimization

PROFESSIONAL EXPERIENCE

Shruntech Solutions -Frontend Developer

May 2023 - Apr 2026

Project: Abdali Hospital — Centralized Scheduling & Operations Platform

A centralized hospital scheduling and operations platform with secure, role-based access control. The system delivers real-time dashboards for Nursing and Emergency units, and maintains comprehensive records of patient and staff activity to support operational decision-making.

Tech Stack: React.js, JavaScript, SCSS, shadcn/ui, Radix UI, Redux Toolkit, React Hook Form, Zod, Axios, Chart.js, Git

- Developed role-based dashboards for healthcare operations and real-time data monitoring.
- Implemented dynamic chart visualizations using Chart.js to surface key operational insights for hospital management.
- Built reusable UI components with shadcn/ui and Radix UI.
- Integrated React Hook Form with Zod schema validation for complex multi-step patient and scheduling forms.

Project: Delmonte

A scalable, type-safe web application built for internal operations management. The platform provides dedicated modules for Managers and Directors to streamline user oversight, product workflows, and operational reporting, integrated with SAP backend.

Tech Stack: React.js, JavaScript, React Router, Bootstrap, Redux Toolkit, React Hook Form, Yup, Chart.js, SAP APIs

- Collaborated with the product team to design, develop, and implement the frontend admin panel using React.js.
- Integrated SAP backend APIs to retrieve, transform, and display operational data based on user roles.
- Built distinct Manager and Director modules with role-specific views and permission-controlled features.
- Implemented form validation using React Hook Form and Yup to enforce data integrity across all data-entry workflows.

Project: Digi POS

A feature-rich restaurant management admin panel enabling real-time control of orders, payments, tables, and Kitchen Order Tickets (KOT). The application was designed for high usability under fast-paced restaurant operations.

Tech Stack: React.js, JavaScript, React Router, Bootstrap, Redux Toolkit, Formik, Chart.js

- Designed and implemented the frontend admin panel for restaurant order and table management using React.js.
- Integrated RESTful APIs to enable real-time order tracking, table status updates, and KOT generation.
- Built form-driven workflows for order creation and payment processing using Formik with field-level validation.
- Delivered a responsive, mobile-friendly layout to support both desktop and tablet point-of-sale usage.

Project: Pure You — Jewelry E-Commerce Platform

A full-featured jewelry e-commerce platform consisting of three integrated modules: an Admin Portal, a Vendor Portal, and a Customer-Facing Website. The platform supports end-to-end product lifecycle management, vendor operations, and a rich shopping experience for customers browsing rings, necklaces, diamonds, bracelets, and more.

Tech Stack: React.js, JavaScript, React Router, Redux Toolkit, Material UI, Minimal UI Kit, Postman, Zoho

- Built and enhanced admin, vendor, and customer portals using React.js.
- Developed features for product, vendor, sub-admin, and banner management.
- Built the vendor module to allow vendors to view their product listings and manage incoming orders.
- Integrated RESTful APIs using Axios to retrieve and display product, order, and sales data across all three modules.
- Performed API testing and validation using Postman, and tracked issues using Zoho.

EDUCATION**Creative Design & Multimedia Institute, Surat**

2022

Frontend JS Development (React.js)

Mahavir Swami College of Polytechnic, Surat

2017

Diploma in Electrical Engineering

Gujarat Board

2014

Secondary School Certificate (SSC)

SOFT SKILLS

- Strong verbal and written communication with active listening skills
- Excellent problem-solving and analytical thinking abilities
- Effective time management and task prioritization in fast-paced environments
- Collaborative team player with a self-driven and ownership-oriented mindset
